Business Analyst with hands-on SAP S/4HANA and SAP HANA migration experience, focused on the early-stage diagnosis that sets a greenfield programme up for success. I assess and document AS-IS processes, systems, data and interfaces, quantify gaps and inefficiencies, and turn findings into prioritised, decision-ready requirements. I work alongside IT architecture, process owners and auditors to keep technical delivery aligned to business needs — and I deliver outcomes such as a from-scratch budget model in a 2-week window and PowerQuery ETL processing 1,500+ bookings per close with zero manual intervention.
