Business Analyst who thrives in the requirements and selection phase of ERP programmes. I translate operational needs into structured business, functional, data and integration requirements, and I help teams evaluate and select solutions against explicit criteria. Across SAP S/4HANA and SAP HANA programmes in France, Belgium and the Netherlands, I have collaborated with IT architecture and process owners, selected and rolled out BI/ERP solutions such as QlikSense, and connected ERP data to Power BI reporting — so I can support RFI/RFP preparation, vendor demonstrations and a defensible final selection and implementation strategy.
