Process-focused Business Analyst who helps organisations design and adopt a future-state operating model around a new ERP. I map and assess AS-IS processes, quantify gaps and inefficiencies, and pair that diagnosis with change-management and adoption structures so transformations actually take root. I have facilitated stakeholder sessions, driven process optimisation, and delivered results such as a budget model rebuilt from scratch in a 2-week window, PowerQuery ETL handling 1,500+ bookings per close with zero manual intervention, and RPA + self-service BI adoption across client teams.
